

Fuel Rail Adapter Kit for Tall Performance Injectors P/N 534-212

Parts List:

P/N	Description	Qty
85R9725	Brackets for LS3 & L99 applications	4
85R9726	Brackets for LS2 applications	4
	Adapter O-rings	8
	O-ring Lubricant	1

Brackets:

For bracket installation, see instructions included with the fuel rails P/Ns 534-209 and 534-210.

Adapter O-rings:

There are numerous injectors available for this application and their dimensions vary. This o-ring has been engineered to adapt most tall style injectors to LS2, LS3, L99, and similar intakes. Confirm that the injector's lower O-ring groove fits the below dimensions. Because of the required large O-ring cross-section, any injectors outside of the dimensions cannot be adapted to these intakes and should not be used with this kit.

O-ring lubrication:

Apply the supplied lubricant to all O-rings before assembly.
