P/N: 280-SW-IQ3BTN
IQ3 Remote Buttons with Coil Cord
Installation Instructions

1) Use a small flat blade screwdriver to remove the plastic orange wedge from the front of the connector.
2) Inside the connector you will see a lock for each wire. Use a screwdriver to pull back on the lock and remove the factory installed blue, white and black wires from positions 1,3 and 4.
3) Locate the remote button panel connector. Reinstall the blue, white and black wires on the remote button panel connector in to positions 1,3, and 4 as shown in the illustration above.
4) Reinstall the orange wedge on the front of the connector.

**The two remote buttons are color coded.
Red is BUTTON 1 and Black is BUTTON 2.**
